

The 1st poster prize for the presentation **"Efficient Electro-Fenton Degradation of Pharmaceutically Active Compounds in a Novel Flow-Through Device"** was awarded to Dr. Konstantinos Plakas, PostDoc researcher in NRRE/CPERI, in the context of the 3rd European Conference on Environmental Applications of Advanced Oxidation Processes (EAAOP3) that took place in Almeria, Spain, from 27 to 30 October 2013.

The poster presented the main research findings of "NHRON" project which is financially supported by the General Secretariat for Research and Technology, Greek Ministry of Education, through the programme EPAN-II/ESPA: "SYNERGASIA", Project No. 09-SYN-42-630. The Laboratory of Inorganic Materials at CPERI /CERTH and the enterprise TEMAK A.E.T.E. are partners in this project.
